This unique social thinking program is designed for children in elementary through high school. The curriculum teaches children the necessary communication skills needed to navigate a full range of social situations and focuses on targeted group activities which make the hidden rules of daily social interaction simple and clear for kids who find it difficult to:

- Establish and maintain friendships
- Share space effectively
- Interpret social cues
- Work in groups
- Understand the hidden meaning of spoken messages
- Pay attention and stay focused
- Organize school tasks

Remember.....Involved parents ensure the best results for our children!
